

# Nutrition

Dissemination and empowerment

Nídia Braz, Maria Palma Mateus, Sandra Pais

School of Health, Centre for Research and Development in Health,  
University of Algarve

# Using a common, integrated vision on the nutritional approach to frailty.

# Food quantity and quality depends on

## Personal choices

- Cognitive condition
- Preferences
- Appetite
- Education/religion/  
social status

## Money available

## Access

- Medical condition
- Social isolation
- Help/assistance

# Nutritional problems are diverse

**Overweight**

**Undernutrition/  
malnutrition  
and overweight**

**Malnutrition**

Farmers  
Health professionals  
Culinary experts  
Caterers  
Housewives  
Consumers of all ages

**need reliable information about**

healthy food (composition, stability and safety)

healthy cooking (methods and seasoning)

healthy eating (needs, portions, meals)

Information and training to address  
different ages,

social environments,

professional groups

and EU regions
