2. Main challenges in regional welfare

- an **ageing** population;
- a growing **dependent elderly population**;
- the de-institutionalisation (promotion of the community-based services, of independence and self-sufficiency);
- an impoverishment of **natural health networks**;
- the presence of numerous foreign **family assistants**;
- the organisation of **new models of governance for innovative care** and assistance;
- the **economic** sustainability of the regional welfare system.

FVG regional challenges consistent with EIP - AHA

- the **evolution of relationship** between public and private (PPP)
- promoting a **culture of participative responses at community level** opposing the traditional culture of institutional care.
- the **resources available** for welfare system (sustainability).
- the **integrated policies** to be adopted (health, social, housing, transport, R&D, education)
- **ICT** and **accessibility** measures;
- The **social role** of the elderly individual

Framework of actions for living at home and measures against the institutionalisation of elderly

How to manage and implement them?

“Autonomy and independent life”

Regional Fund;

public resources destined to the elderly, persons with disabilities and their families to be used within customised projects for autonomy and independent life

Experimentation

“Social housing”

for elderly and persons with disability

Public funds to municipalities for the experimentation of social housing projects as alternatives to the institutionalisation process of the elderly and people with disabilities

Strengthening and re-organisation of home-based social and healthcare services;

according to a community development approach in which professional services are complemented by the promotion of social protection networks

FVG Region most recent experiences on innovation in welfare system: Regional Law on innovation

Call for tenders

- Public and Private Partnership : Municipalities, Health Agencies
R&D centers, SME;
 - Promotion of quality of life at home for elderly and dependent;
 - Adaptation of apartments with technologies;
 - Teleassistance and telemedicine;
- **in 2012 a system approach will be adopted by implementing a strategic project that will involve public structures of the social and health regional system**

FVG Region most recent experiences on innovation in welfare system: Regional Laboratory on Accessibility, Domotics and Quality of Life

A Regional Laboratory involving public and private partners (PA, SME, R&D)

Housing and independent living	Social Innovation (PPP and community welfare)	ICT
--------------------------------	---	-----

The Laboratory, started as a project, is now officially established by a Regional Act (FVG Region Health and Social Services Regional Plan 2010-2012, through the Local Health Agency n.5 that acts on Region's authority with its Operational Plan 2011).

The Laboratory framework is consistent with EIP – European Innovation Partnership principles and with the Europe 2020 strategy.

The Laboratory supports the internazionalition of regional policies on health and social inclusion (networks, participation to fairs and International workshops, project proposal, etc..). A catalogue of services and products of the Laboratory partners is currently being edited.
