

The National Training Plan—NTP of the Mattone Internazionale Project is composed by two courses.

The second course, here outlined, intends to examine various ways, methods and tools of project development (Project Cycle Management) aiming at improving the success rate of EU grants requiring a shared approach with foreign partners. Furthermore, the course will analyse various aspects of project-cycle management including implementation tools, reporting and monitoring.

General aspects related to the EU funding opportunities will be illustrated during the training session, which will be focusing on the existing and future multi-annual financing period.

This course aims to encourage participants to adopt a project approach in order to better coordinate the development of EU and International projects.

METHODOLOGY

The ultimate objective of the course is to increase knowledge among participants on how to use independently the management tools provided. The course foresees lectures and group work. Additional material will be provided through Webinars available on the Mattone Internazionale Project.

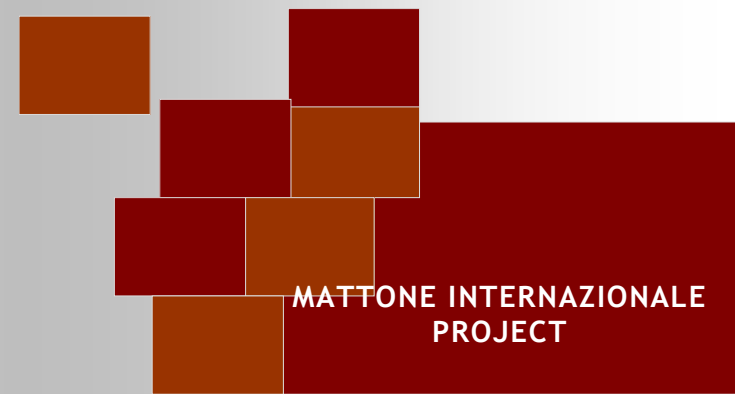

Venue: Villa Romanazzi Carducci
