# RehAllianCE

Optimizing usage of new technologies in  
rehabilitation to improve life quality of  
Central Europe inhabitants

This project is supported by the Interreg CENTRAL  
EUROPE Programme with co-financing from the  
European Regional Development Fund.

Project Budget in EUR

1.578.032,80

ERDF Funding in EUR

1.262.462,24

Project Duration

05.2024 - 10.2026

Rehabilitation is care that helps people get back or improve abilities necessary for their daily life. The challenge is that such a care often lies with the family without much systemic or technological support. The RehAllianCE project helps MedTech companies to break-through and accelerate the commercialization of their products. The project partners share experiences and good practices to develop a set of policy recommendations to improve the health care sector's innovation governance. They will test new technologies, such as rehabilitation robots or exoskeletons, assistive devices, wearables or telemetric tools.
