

TRANSFORMING HEALTH  
AND CARE SYSTEMS

# THCS Knowledge Hub Content, Tools and Opportunities

20 February 2026

Funded by the European Union under the Horizon Europe Framework Programme - Grant Agreement N°: 101095654. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Health and Digital Executive Agency (HADEA). Neither the European Union nor the granting authority can be held responsible for them.

Co-funded by the  
European Union

# Outline

- Rationale and ambition of Knowledge Hub
- Objectives of the Knowledge Hub and benefits for the users
- Development of the Hub – Key principles
- Structure of the Hub
- Functionalities of the Hub and examples of current content
- Opportunities for engagement

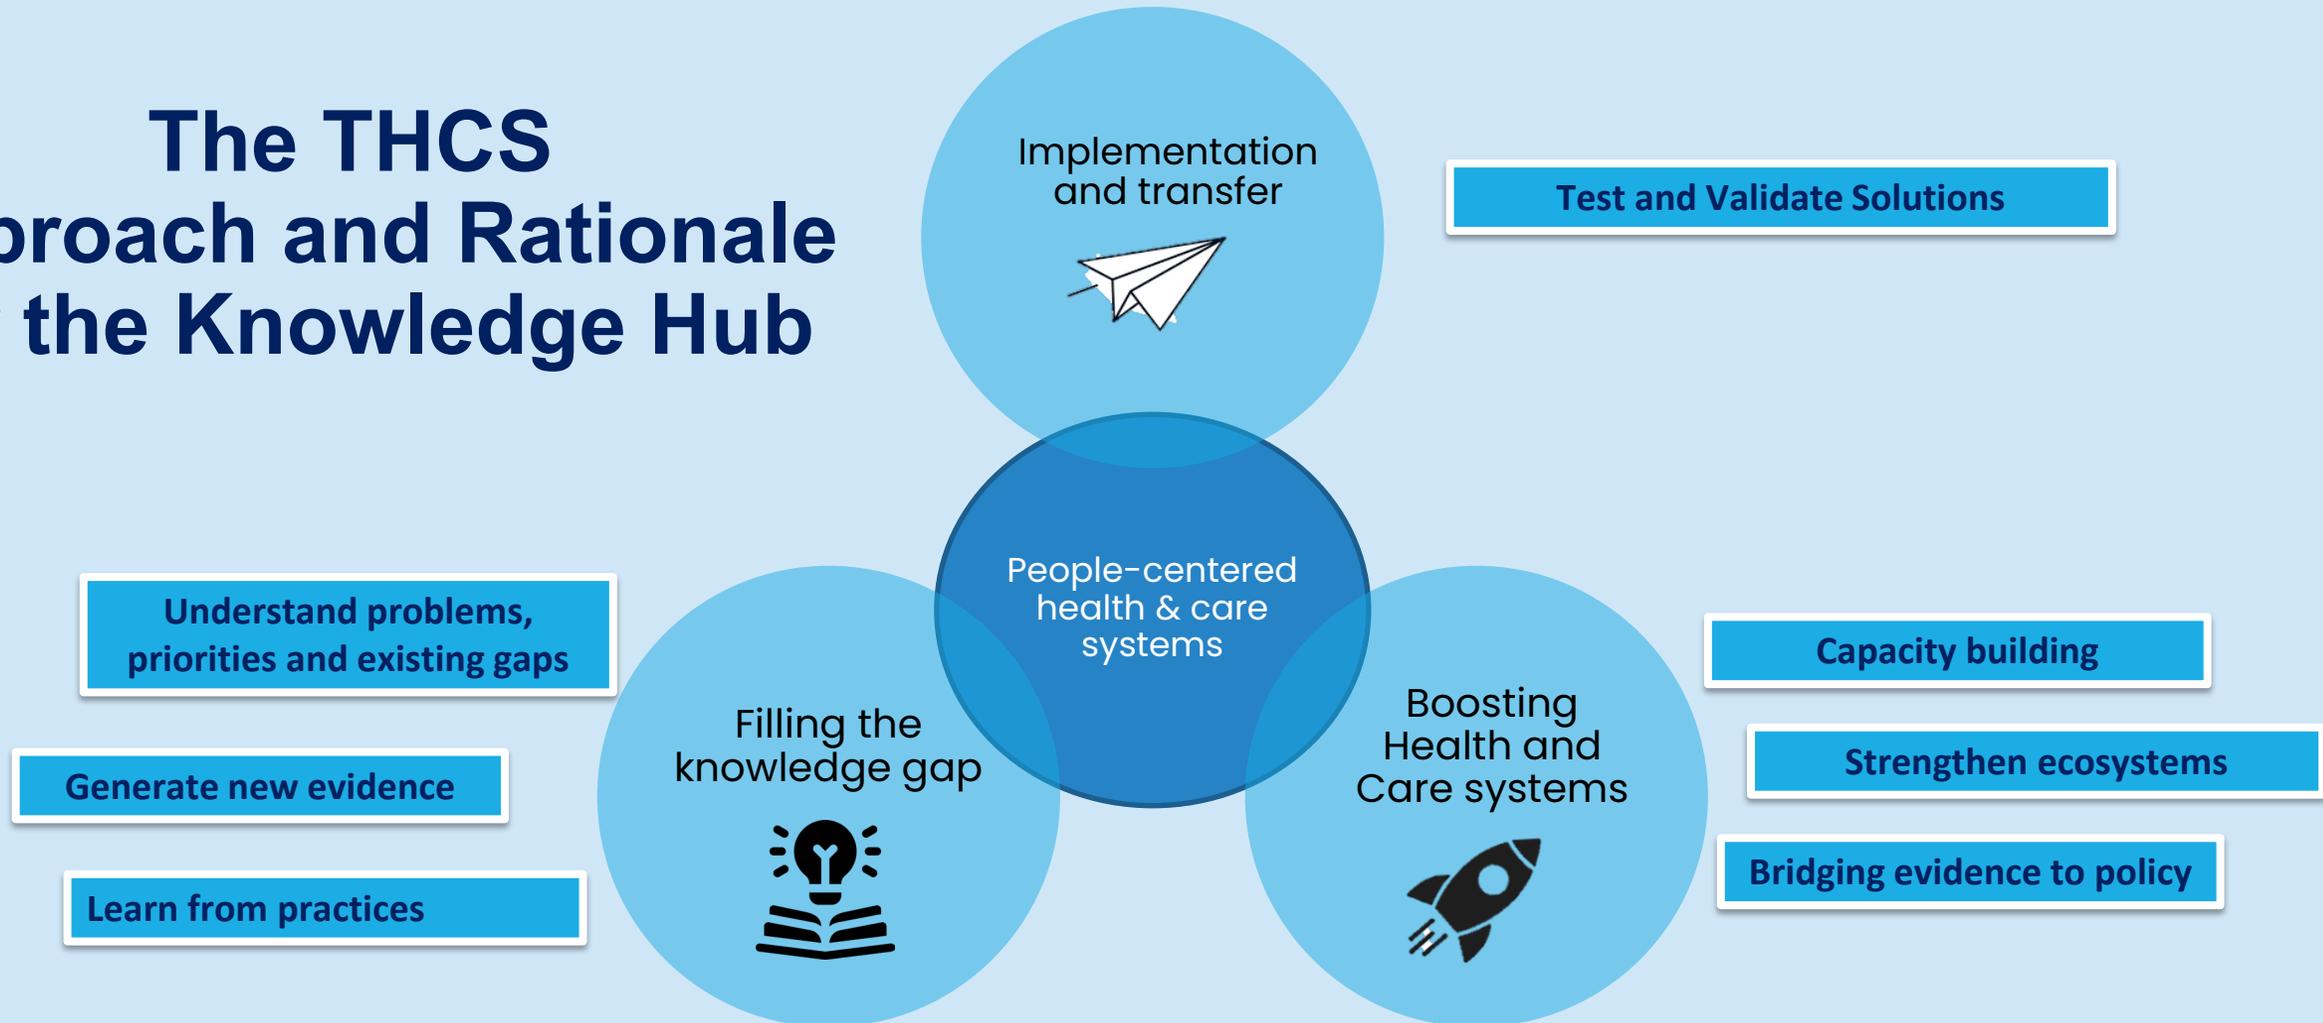

# Rationale and Ambition of the Knowledge Hub

Funded by the European Union under the Horizon Europe Framework Programme - Grant Agreement N°: 101095654. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Health and Digital Executive Agency (HADEA). Neither the European Union nor the granting authority can be held responsible for them.

Co-funded by the  
European Union

# The THCS Approach and Rationale for the Knowledge Hub

## THCS Knowledge Hub: Ambition

*The aim is to co-design and implement the THCS Knowledge Hub which will act as a multi-functional platform fostering capacity-building support, exchange of good practices, knowledge and experience of different health and social care actors at macro, meso and micro levels for the transformation of health and social care sectors.*

# Objectives of the Knowledge Hub and Benefits for the Users

Funded by the European Union under the Horizon Europe Framework Programme - Grant Agreement N°: 101095654. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Health and Digital Executive Agency (HADEA). Neither the European Union nor the granting authority can be held responsible for them.

Co-funded by the  
European Union

# THCS Knowledge Hub: Objectives

Connect researchers, policymakers, funders, practitioners, and other stakeholders

Promote knowledge sharing and mutual learning

Increase visibility of projects, expertise, and good practices

Support cross-country and cross-sector collaboration

Enhance the impact and uptake of research and innovation in health and care systems

# THCS Knowledge Hub: Target Users and Benefits

## Policymakers

- Rapid access to policy-relevant evidence
- Insights into what works (and what doesn't) in system transformation
- Access to real-world examples of transformation in practice from different regions and contexts
- Access to experts and research networks
- Support for evidence-informed decision-making

## Cross-Cutting Benefits (All users)

- **Builds a shared language around system transformation**
- **Encourages collaboration rather than siloed working**
- **Promotes equity, sustainability, and long-term system resilience**
- **Creates a trusted space for knowledge exchange**

## Funders

- Insight into high-impact investment areas
- Access to evidence of system-wide impact and scalability
- Opportunities to align stringer the funded research and policy/practice needs
- Opportunities to coordinate funding with other organisations

## Practitioners & System Leaders

- Practical, actionable insights for service redesign
- Access to tested models of transformative care
- Peer learning and shared implementation experience
- Tools, frameworks, and evaluation guidance
- Connection to researchers for collaborative problem-solving

## Researchers

- Access to evidence
- Interdisciplinary collaboration opportunities
- Visibility and dissemination of research to policy and practice audiences
- Opportunities for co-production with practitioners and system leaders
- Access to real-world case studies and data sources
- Reduced duplication of effort through shared learning

## Development of the Hub: Key Principles

Funded by the European Union under the Horizon Europe Framework Programme - Grant Agreement N°: 101095654. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Health and Digital Executive Agency (HADEA). Neither the European Union nor the granting authority can be held responsible for them.

Co-funded by the  
European Union

# THCS Knowledge Hub: Key Designing Principles

- The key driving force for the development of the Hub is a **bottom-up approach** with the **users at the centre of co-design process**.
- The Knowledge Hub is an **online platform designed as a module-based platform**.
- **Several iterations of co-design are being undertaken** to enable continual improvement in the development of the Hub.
- **Mapping of existing Hubs and knowledge exchange platforms was conducted** to ensure we build on the existing resources and tools rather than duplicating the efforts and reinventing the wheel.

## Structure of the Hub

Funded by the European Union under the Horizon Europe Framework Programme - Grant Agreement N°: 101095654. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Health and Digital Executive Agency (HADEA). Neither the European Union nor the granting authority can be held responsible for them.

Co-funded by the  
European Union

HOME RESOURCES CAPACITY BUILDING SYNERGIES TRANSFER & IMPLEMENTATION ▾ COMMUNITY ENG ▾ ADMIN Andrea ▾

## Hello Andrea, Transforming Health and Care Systems

### Welcome to the THCS Knowledge Hub

The ambition of the THCS Knowledge Hub (KH) is to maximise the value of existing evidence and experience in transforming health and social care systems in order to improve the capacity of countries, regions and organisations to adopt and scale up the necessary change by:

#### Experience

Capturing, sharing and exchanging experience that help to address the needs and priorities of European regions and countries in transforming their health and social care systems.

#### Evidence

Generating new evidence and knowledge on the transformation of health and social care systems.

#### Personalised support

Co-designing personalised support for those seeking to prepare the ground for transition and/or improve existing system design by facilitating tailored knowledge transfer activities.

#### Capacity building

Utilising outcomes of capacity-building activities to speed up the transformation of health and social care systems in Europe.

<https://knowledgehub.thcspartnership.eu/>

# Structure of the THCS Knowledge Hub - Resources

## Resources

THCS resources are readily available as well as newly generated evidence and experience in transforming health and social care systems which are generated by THCS as well as wider European and international community.

These can include good practices, innovative solutions and approaches, policy instruments, tools and methodologies, human expertise, blog posts, journal articles, presentations, webinars and success stories. These resources are clustered by search criteria to facilitate the access to the tailored resources supporting the users in their journey towards health and social care transformation.

# Structure of the THCS Knowledge Hub – Transfer & Implementation Framework

## Support for Transfer and Implementation

The THCS Transfer and Implementation Framework consists of three sections. The handbook provides guidance on how to transfer and implement a health and care solution developed elsewhere into a new environment. The solution description template enables the documentation and sharing of original solutions, as well as the reporting and sharing of results from adapting a solution developed elsewhere. The tools offer methods and tools to support the transfer and implementation process.

### Handbook

Utilise the THCS handbook to support your transfer and implementation process.

# Structure of the THCS Knowledge Hub – Community

## Community

Are you working to research and / or improve the transformation of health and social care systems?

The THCS Community is open to everyone involved in or interested in this work – including THCS partners and funded projects, members of the Ambassador Network, Advisory Board, and other European or international stakeholders.

This is a space to connect, exchange ideas and learn from each other. Tell us about your research, share your experiences, ask questions or start a discussion – your inputs will help to strengthen our collective knowledge and impact on the transformation of health and care systems.

# Functionalities of the Hub – Sharing the Resources

## Resources

Have you found resources that have been useful to you in your health and social care transformation journey? Please share them here so that others in the THCS Community can benefit too!

In this section you'll find a wide range of resources created by THCS partners and other stakeholders from across Europe and beyond. These include good practices, innovative ideas and approaches, policy tools, practical methods, blog posts, research articles, presentations, webinars and success stories.

You can search or filter by topic to quickly find the most relevant content to support your health and social care transformation journey.

[Browse and use tools →](#)

# Functionalities of the Hub - Transfer and Implementation Framework

## THCS Handbook for Transferring and Implementing Health and Care Solutions

### Introduction

### What is transferring and implementing about?

- Iterative Transfer and Implementation Process
- Solutions as Practices
- Relational Evidence
- Theory of Change

### How to do it – when transferring and implementing?

- Demand-Based Development
- Person-Centred Development
- Co-Creation
- Mutual Learning
- Openness and transparency
- Agility
- Evidence Generation

### What to do – when transferring and implementing?

- Describing Health and Care Solutions
- Allocation and resource development

## THCS Handbook for Transferring and Implementing Health and Care Solutions

The THCS Transferability and Implementation Framework supports and promotes the transfer and implementation of health and care solutions across the countries, regions, and organisations. The framework:

- Helps to understand what transferring and implementing is about.
- Provides means for describing health and care solutions to facilitate their adoption in other health and care systems.
- Offers guidance on how to perform the various tasks involved in transferring and implementing solutions developed elsewhere,
- Highlights the key tasks necessary for transferring and implementing solutions.
- Focuses principally on complex solutions
- Is aimed at those who manage, coordinate, plan, and perform transfer and implementation activities in health and care organisations as part of programs, projects, and everyday practices.

### Introduction

Health and care systems across Europe face similar challenges: aging populations, rising chronic diseases, growing health and social needs, and tight budgets. Instead of reinventing the wheel, sharing and adapting evidence-informed solutions can save time, cut costs, and improve care.

The THCS Transferability and Implementation Framework helps speed up the adoption of evidence-informed solutions—like treatments, services, processes, and policies—by adapting them to new settings. Since what works in one place may not work everywhere, the framework supports identifying and adapting existing solutions to local needs. Creating new solutions should only happen when no suitable option already exists.

The framework mainly focuses on complex health and care solutions—those that combine many different actors, elements, and interactions to improve care. These solutions need careful coordination, flexible strategies, and ongoing updates to stay effective, as they must manage many connected factors that impact patient and client outcomes and care quality. Still, the framework can be used for simpler solutions too.

This framework is designed for professionals involved in managing, planning, or delivering health and care services in projects, programs, or daily operations.

### What is transferring and implementing about?

# Functionalities of the Hub - Transfer and Implementation Framework

## Browse and share health and care solutions

Clear descriptions of health and care solutions are essential for their transfer, adaptation, and implementation. A well-defined theory of change helps explain how a solution is expected to achieve its intended outcomes and under what conditions it works best.

In this section, you can explore a range of health and care solutions that have been developed or adapted by other Knowledge Hub users. Each solution description has undergone a review process focused on clarity and usability, ensuring that they are presented in a way that supports their adoption in different contexts and settings. The review process did not assess the evidence of effectiveness.

If you have developed or adapted a solution yourself, you are warmly encouraged to share it with the community by completing the online submission form.

*Before sharing your solution, please read these guidelines carefully.*

## Community-Based Obesity Prevention and Lifestyle Promotion Initiative (COPLPI)

Patients & Consumers | Healthcare Professionals (HCPs) | Policy Makers & System Leaders

Health Promotion & Disease Prevention | Finland

### Purpose of the solution

The COPLPI aims to reduce obesity prevalence and encourage healthier lifestyles within communities. The objectives include raising awareness about the importance of nutritious eating and regular physical activity, improving access to affordable healthy food options and fitness programs, and fostering an environment conducive to long-term, sustainable lifestyle changes.

### Solution as a practice

The Community-Based Obesity Prevention and Lifestyle Promotion Initiative (COPLPI) is underpinned by a clear theory of change that recognizes the multifaceted nature of obesity and its prevention. The initiative posits that meaningful and sustainable reductions in obesity prevalence can only occur through a coordinated, multi-sectoral approach that addresses individual behaviours, family dynamics, community resources, and systemic barriers. By fostering collaboration among key stakeholders, COPLPI aims to create an enabling environment that supports and sustains healthy behaviours across different levels of society. The process of the solution unfolds through a series of interrelated phases, each designed to achieve specific milestones that contribute to the overall goal of reducing obesity:

### Evaluation of the original solution

No evaluations yet for this solution.

### Evaluation of the adapted solutions

No adaptations yet for this solution.

# Functionalities of the Hub - Transfer and Implementation Framework

## Transfer and Implementation Toolbox

This section offers a curated selection of tools and toolkits designed to support the transfer, adaptation, and implementation of health and care solutions across countries, systems, and organisations.

The toolbox provides practical resources to guide the transfer and implementation process.

Explore frameworks, methods, tools, and templates that help bring evidence-informed health and care solutions into everyday practice.

TOOL

### Equity guiding questions

The online tool provides guiding questions different ways throughout each implementation action or activity. The tool has been designed by The Centre for Implementation (Khan & Moore 2023).

Purpose: Other assessment tools

TOOL

### StrategEase Tool

StrategEase is a free, online interactive tool. The goal of the tool is to guide you through the process of mapping barriers and facilitators to a list of change strategies. The tool has been designed by Centre for Implementation (2022).

Purpose: Scaling up

# Functionalities of the Hub – Community-building

## Community

Are you working to research and / or improve the transformation of health and social care systems?

The THCS Community is open to everyone involved in or interested in this work — including THCS partners and funded projects, members of the Ambassador Network, Advisory Board, and other European or international stakeholders.

This is a space to connect, exchange ideas and learn from each other. Tell us about your research, share your experiences, ask questions or start a discussion — your inputs will help to strengthen our collective knowledge and impact on the transformation of health and care systems.

## Current Functionalities

HEALTH PROMOTION AND PREVENTION

DIGITAL HEALTH AND CARE

INTEGRATED CARE

PROCUREMENT

INDIVIDUALS AND COMMUNITY ENGAGEMENT

HEALTH AND CARE FINANCING

### Applications for the Venice Summer School 19-25 July 2026

The [Observatory Venice Summer School](#) is a week of learning, dialogue and exchange, and a chance to share experiences with other policymakers, planners, and professionals. The topic for the Summer School is: Paying for health care in the face of fiscal constraints: how to generate adequate revenues and to spend better.

### DIGITAL HEALTH AND CARE

**Alon Kalron**  
05/12/2025 17:25

We are excited to share that we are currently testing a new digital telerehabilitation tool designed to promote physical activity and improve mobility in people with multiple sclerosis (MS). This innovative system uses accessible, home-based technology to support personalized exercise programs and reduce barriers to rehabilitation.

For those interested, here is the overview protocol: <https://www.researchprotocols.org/2025/1/e75983>

### UKRI Contracts for Innovation in drug and alcohol addiction healthcare

Opens: 16/02/2026 Closes: 06/05/2026 11:00  
Opportunity Type: Contracts & procurement, Funding

Innovate UK, on behalf of the Office for Life Sciences (OLS) Addiction Healthcare Goals programme (AHG), will invest a share of up to £20 million in this [Contracts for Innovation](#) competition. This is subject to a sufficient number of high quality applications being received. The aim of this AHG Catalysing Innovation Awards scheme is to progress innovations for improving recovery outcomes, enhancing recovery and reducing harm and deaths in drug and alcohol addiction healthcare. [Funding](#) is targeted at promising pharmaceutical, MedTech and digital interventions with potential to secure early efficacy and UK market fit data and set out a clear plan for gaining regulatory approvals and certification.

# Functionalities of the Hub – Community-building

## Develop functionalities to:

- **Connect** and engage with professionals working on similar health and care system challenges.
- **Build meaningful collaborations** that go beyond individual projects.
- **Share and Discover Knowledge**
- **Learn** from real-world implementation efforts and innovative approaches across regions.
- **Contribute** to shaping research and innovation agendas aligned with health system needs.
- **Increase the visibility and uptake of your work.**
- **Find Opportunities**
- **Stay informed** about relevant initiatives, calls, events, and emerging themes within the THCS partnership.
- **Join Thematic Discussions.**
- **Strengthen impact.**

The screenshot shows the REHEAL Followers Community page. At the top, there is a search bar and a navigation menu with items: REHEAL, Information, REHEAL Newsroom, Events, Announcements, Members, Organizations, Communication, and Documents. The main header features a large image of hands joined in a circle, with the text 'REHEAL Followers Community' overlaid. A large red text overlay reads 'Proposed Functionalities'. Below the header, there is a 'Group Information' section with the following text: 'REHEAL Followers Community', 'A Buyer-Led Network Preparing Healthcare Systems for Circular Procurement', '26 Members', and a paragraph describing the community's purpose. To the right, there is a 'Your Status' section showing 'Member' and a 'Leave group' button. Below that is a 'Group Admins' section with a profile picture of a man. At the bottom right, there is a 'Messages' button with a profile picture of a woman. Red circles and lines highlight the navigation menu, the 'Proposed Functionalities' text, the 'Your Status' section, and the 'Messages' button.

# THCS Knowledge Hub: Opportunities for Engagement

- **Shape the Direction of Knowledge Hub Development by:**
  - Contributing to the Knowledge Hub with your research, real-life examples and good practices.
  - Sharing case studies and lessons learned to help others avoid duplication and accelerate system-wide improvement
  - Promoting your local, regional and national projects and build synergies with other existing initiatives across Europe and beyond and maximise their reach.
  - Engaging in capacity-building activities
  - Participating in co-design activities to ensure the Hub offers a platform tailored to the needs of users whether you are researcher, policy-maker, funder, practitioner or system leaders.
- **Expand Your Network and Influence by:**
  - Engaging and collaborating with THCS Knowledge Hub Community to refine research questions, identify gaps, and ensure future work addresses the system's most urgent needs.
- **Support the transferability and scaling-up of good practices by:**
  - Applying the Transferability and Implementation Framework in real-life settings
